ABOUT THIS EDITION

A tribute to all Teachers

"One child, one teacher, one book, and one pen can change the world."

– Malala Yousafzai

This edition of Kid's Galaxy celebrates all the teachers and their great acts of kindness which influence children for eternity.

We hope you enjoy reading it!

NGF

Free Workshop Group

A Social Initiative by Nanhagyan Foundation

- Different workshops for kids and adults conducted free of cost.
- Experts from different fields give their views and guidance.
- These workshops are conducted every week, on Sundays, which the entire family can be a part of.
- Till date we have conducted nearly 8 to 9 workshops on it.
- The motive is to engage the kids constructively.

Nanha Gyan Healthy Minds

A Facebook Community
founded on 17th April 2020

Currently, it has more than 7000 people
250+ live sessions are available

National/International level Competitions

- Prerna
- Fancy dress
- Ganesha Festival
- Hassi ka Hunnar
- Super Star Chef

Total Entries- 2500+
Average reach - 8800+ people

Nanha Gyan Foundation

Our Mission

To establish a foundation for a society where every smile is real.

Our Vision

A harmonious society is a cumulative results of small actions by kind and compassionate people.

Our Values

Simplicity

Because all great things are generally simple.

Believe

Sometimes people need someone else to believe in them, so that they can believe in themselves.

Kindness & Compassion

Because some problems can be identified and solved by kindness and compassion.

Cover Story

"A Passionate Educator"

"The true teachers are those who help us
think for ourselves."

- Dr. Sarvepalli Radhakrishnan

An enthusiastic and energetic leader in empowering and engaging young minds in innovative and collaborative learning practices. She began her career by teaching, English and Social Studies in a school for the deprived children.

Having worked with a plethora of well-known schools such as Vibgyor High, Rims International, NIBM, Euro School, Undri, Trinity International, Global Talent International School, and now with Gayatri Group of Schools as Executive Director. She has been in this profession for the last 17 years and has climbed the ladder of success from being a Co-teacher to the Principal to the Executive Director, and now the founder of her now e-platform, EduDrone - We Connect.

Being an eminent speaker and having voiced many leadership conferences, she often participates in the educational panel discussions. She is known for her go-getter attitude, helps teachers beyond one's imagination and being with the young energy is her passion. She works in the school system and follows a 360 degree approach, may it be organizing Global Inter School Competition collaborating with schools across the globe, Science and Math Futuristic Expos, School is Cool Kids Carnivals. She strongly believes that students are the sole reason for the educators' existence, and teachers must exert their energy in bringing new avenues for the young minds, make them creative and provide the wings of innovation.

EduDrone has organised various summits, conferences and knowledgeable sessions for students, parents, teachers and principals. EduDrone Team has published 2 books featuring over 170 authors' stories in it. First book 'Blessings of Life in 2020' - Over 108 stories to inspire you' and second book 'Soulful Wonderful Blissful 2021' – Stories from Men of Character and Women of Substance' featuring over 62 stories. Third Book, We are Leaders, and Expressions and Experiences, is in the making....

She has received the ISA, School Coordinator Award- 2017 from British Council, coordinating seven international projects bringing international collaboration in the school curriculum.

She has received many awards as the best teacher and the best Principal. She is the recipient of 'Torch Bearer Award of ART TO CONNECT, Pune, 2019-20, for incorporating inclusive education felicitated by Dr. Nirmala Krishnan, founder of Link the Dots.

Outstanding Community Award 2020, for organizing knowledge exchange sessions for educators during the time of pandemic and supporting educators unconditionally.

Indian Humanitarian Award 2020 and Philanthropist Award 2021, Shiksha Kranti Award 2021, Global Iconic Leadership Excellence Award for Academics & Skill Development 2021, for her online educational sessions through her platform of EduDrone – WE CONNECT.

She says, being an educator, one must be conditioned to work under the capacity of 'P to P' – 'Peon to Principal', work more than her team and set an example in front of her subordinates, treat them as equal stakeholders, prepare leaders in every department, give them the liberty to use their creativity and witness magic each day in various departments.

'A Happy Teachers' Day to the community of makers, creators, innovators and design thinkers.'

Handwriting Analysis

Graphology

-Rommal Surana

Why should you get your handwriting analyzed?

We all make efforts to succeed in life because of the subconscious reprinting of certain limiting thoughts and beliefs, we are unable to achieve the desired result in a relationship, career, financially and personal growth. Handwriting Analysis helps to reveal those obstacles and help you to achieve success and growth in all spheres of life.

Why should you learn graphology?

Graphology is a tool to understand the patterns of your subconscious mind. It helps to streamline your effort in the right direction. Whether you are a family person, professional, employee, or employer graphology equips you to know yourself better. It also enhances your relationship with others at all levels.

Learning Styles in children

As parents and teachers, we all know the importance of learning. Every child is unique and has its own information absorption pattern. It basically means the speed of understanding - assimilating - action - retention, and retrieval. When we look at the Handwriting Analysis (graphology) point of view we understand learning in three basic patterns.

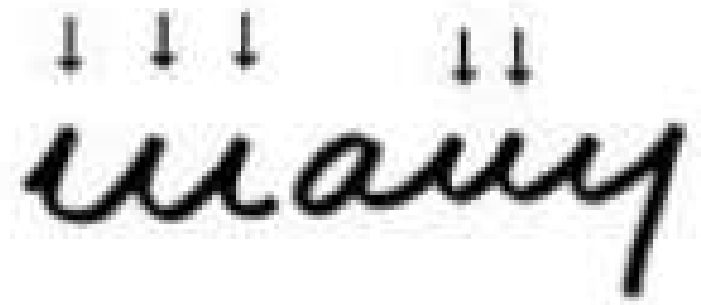

Cumulative pattern

This is shown in the humps of letters m, n. The more curved and round the letters, the writer takes longer time to absorb the information. Once this person learns something, he remembers it for a longer time. The writer requires all facts before taking any action. He learns fast through demonstration and with experience. He is very meticulous, precise, organize, and has the patience to do repetitive work.

Comprehensive Pattern

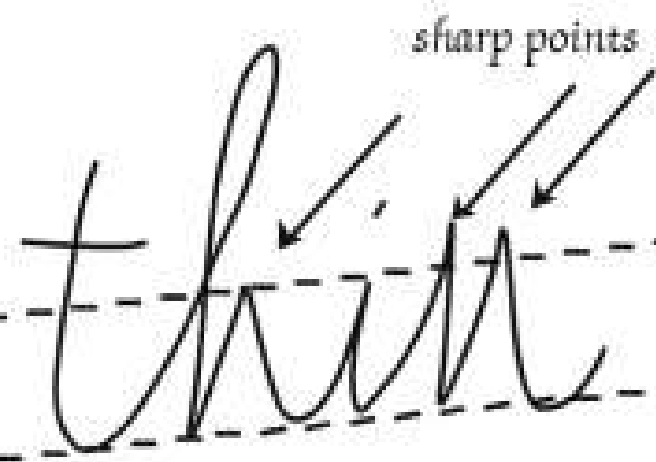

This is shown in the letters m, n, and 'h' and even r with sharp steeple topped. The writer is extremely fast in thinking, analyzing the fact.

He gets quickly bored with slow talkers and thinkers. He is a trouble maker in class. He gets bored easily. He is always keen to learn new things.

Analytical Pattern

It is a sharp "v" formation or retraced line between m and n humps. The analytical writer sifts and examines facts. He interprets all facts by separating them, breaking them down, organizing them from a critical point of view. He is a procedural thinker who thinks methodically, shifting the bad from the good.

Shhhhhhhhh! The Silent letters - Priti Chetan Muthiyan

Silent letters play a very important role in English.

Not only 10 %, 20%, or 30 % but more than 60% of words in English have silent letters. And there are certain rules which will make silent letters easy to use and understand . But yes there are exceptions too.

Silent letter rules:

Some letters are silent before or after certain letters:

Silent 'w' before 'r' wrist, wrong, wrap, wreck, write

'n' is often silent after 'm' autumn, column

Silent 'g' before 'n' gnash, gnat, gnaw, gnarl, gnarly, Enough

Silent 'p' before 's' psychic, psychology, psychiatry, psalm

Some words have silent letters in the middle or at the end:

'l' is often before 'k' folk, yolk, stalk, walk

'b' is often silent after 'm' plumber, crumb, comb, tomb, thumb

'n' is often silent after 'm' autumn, column

The letter 'c' is silent when it follows the letter 's' and comes before 'i', 'e', or 'y'.
For example - Science, Scissor, Scent

't' is often silent after 's'
For example - listen, castle, whistle, wrestle

Students and Teachers during COVID-19 - Charandeep Kaur Keer

Certainly, like many other aspects of everyday life, COVID-19 has had a serious impact on students, instructors, and educational organizations around the globe. The pandemic caused schools, colleges, and universities across the globe to shut down their campuses so that students could follow social distancing measures. That being said, moving smoothly from an environment of conventional education to distance and virtual learning could not happen overnight. This rapid transformation is linked to various obstacles and challenges at this point.

Online courses are provided by hundreds of institutions but two problems exist. First, from a macro viewpoint, very little is established regarding the effects and efficacy of online education. Second, the capacity to successfully teach digitally is likely to differ.

Lack of proper interaction with instructors is another major concern associated with online learning. Additionally, concerns regarding any content of the online course are usually discussed with the relevant course instructor by email, which requires response time. Virtual classes cannot be of interest to students who are tactile learners. Conventional classroom socialization is another major missing in online learning. There is a stronger need for academic organizations to improve their curriculum and the usage of new instructional methods and strategies should be of utmost significance. Educational institutions are also the focal points of social activities and interactions. To develop a system where all needs are taken care of has to be worked upon for holistic development. Teachers are doing a remarkable job and have developed a different level of understanding on an emotional front with the children as well as their families during these Covid times.

Let's hear a
lovely poem from
Vishakha Gupta

Just approach your teacher!

-Vishakha Gupta

“I have come to believe that a great teacher is a great artist and that there are as few as there are any other great artists. It might even be the greatest of the arts since the medium is the human mind and spirit.”

Teaching is a noble profession that allows a person to spread knowledge, share wisdom, and build the youngsters capable and responsible adults in the future. In that sense, the future of this world is truly in a teacher's hands!

A teacher can instigate good actions in their students; therefore teachers are the guiding light for the students. They help a person discover more about themselves. The art of being a teacher is challenging, yet they somehow manage to make it seem so easy.

A teacher brings out the best in students and inspires them to strive for greatness. They impart knowledge, good values, tradition, ways to handle modern-day challenges and find resolutions to problems; thereby changing lives and igniting students most efficiently. Therefore, it will not be wrong to say that a good teacher is an asset to the students and cornerstones of modern-day civilization but it is unfortunate that their hard work usually goes unnoticed.

The following lines appropriately recognize the work done by a teacher:-

When everything's dark
And you feel so alone,
When it feels all is lost
And you just want to run,
It can't just rain forever.
Just approach your teacher.

When family is in pain,
When friends can't be found,

When you just want to scream
But you can't find the sound,
The helping hand is near.
Just approach the teacher.

Dark clouds always pass.
I promise you, child.
We're all standing beside you.
Hold our hand for a while.

Wishing all teachers a very Happy Teachers'
Day.

Vishakha Gupta
Principal
Beacon High School, Pune

Let's hear how
teacher, students
and parents are
interdependent

Cohabitation, Cooperation and Collaboration

-Ishita Ghoshal

Teachers and Parents have interchangeable and interdependent roles. One is incomplete without the other. If classroom environment, culture, and values are why the student's attitude towards learning is what a teacher forms; then she needs the same set of values, culture, and environment to be practiced in nurturing the child as he develops his character, mind, body, and emotions in unison with the collaboration and mutual understanding from both the teachers in his life and the most important teacher - the parent's in his life too. The learning environment and simulations are equally contributing to a child's development through his teachers in the classroom as well as in his life with his parents. Hence when a parent volunteers in a teacher's classroom they can be active participants and can well align and integrate transactions and transfers that shall follow for the child at home and class. Parents must graduate from the passive role of accepting teacher's feedback, assessment and suggestions to the proactive role of volunteers and collaborators alongside the teachers, would see healthier parent-child relations, parent-teacher relations, and teacher-child relations and would drive the learner to respect the processes and outcomes of teaching and learning and become accountable as a learner from early years with a lifelong motivation towards learning and growth. School is not a service that parents invest in for their child, rather a community in which they invest time, effort, money and generate value for their children.

Let's
understand the
role of
grandparents
in parenting

Teacher as a Role Model

-Sonali Gujrathi.

The most important people in our lives are the parents who gave birth and brought us into this world, therefore, parents are the first teachers. A role model can be anyone: a parent, a sibling, a friend. However, the most influential person who gives the right shape to your life is the “Teacher” who teaches and builds our character by telling us the difference between right and wrong.

Chanakya, a minister in the Maurya dynasty and one of the greatest teachers of all times, spoke about the need for teachers in nation-building. He said that this nation will become independent, liberal, and forward when the teachers in that nation guide it efficiently.

Teachers make our future bright with the right guidance. That is why it is said that teachers sometimes are above the parents. Our Teachers are “amazing” and “magical” for their remarkable ability to figure out what makes each child tick, and then zero in on those very things to support big milestones and extraordinary moments.

The best teachers don't give you the answer, but they spark within you the desire to find the answer yourself. Wishing you all a Happy Teachers' Day!

Sonali Gujrathi

Petals Preschool,
Kharadi, Pune

How are
teachers
important in the
life of students?

Importance of teacher

-Neha Kedia

A teacher is a multi-tasking rockstar who lives to inspire and encourage. A teacher is a person who believes in sharing what she/he knows. A teacher is a friend, a counselor, a doctor, an inspiration, a role model, and lots more.

However, being a teacher is never easy. It demands lots of patience to deal with a new set of challenges every day. They create a strong base and foundation for us to make this world a better place to live in. They help us transform ourselves into a shining personality.

“A teacher is like a candle which burns itself to light the way for others”.

Teachers act as a catalyst for innovation. They help children to understand the subject and grasp the concepts pretty well. A teacher also guides children in their career planning and future progression. Their role as a teacher is incredible and invaluable. They help children to explore their talents by exposing them to various paths they can take in life. They uplift their mindset & help them shine. They help us out with all our problems with their guidance & mentoring. A good teacher helps us become good human being in society and good citizens of the country. Teachers impact our lives till eternity and no one can ever say where their influence stops.

"A Teacher plants the seeds of Knowledge,
Sprinkles them with love & patiently nurtures
the growth to produce tomorrow's dreams"

The influence of a good teacher can never be
diminished, which ignites our imagination and
instills the art of learning.

Teachers plant the seeds of Knowledge that
last for a lifetime. A teacher encourages the
mind to think, hands to create and hearts to
love. They teach us discipline and add values to
life, which helps us in the journey of life. A
resemblance of Almighty, who always believes
in us, encourages us, listens to our innermost
feelings, protects from the harsh storm in the
outside world, assists in learning new things
and clarifies all doubts patiently.

A teacher is someone who teaches an
individual to lead a healthy and a wealthy life.
Of course, life and time itself teaches us a lot,
along with the guidance of our parents.

Teachers are a blessing to all of us. Gratitude
to all the teachers for being an inevitable part
of our life.

A heartfelt
letter to
students

An Open Letter

-SHARVARY GOVANDE

Dear Students,
This letter is to appreciate and acknowledge the outpourings of love and affection, over the years, on a day that is very special to every teacher. Thank you so much for making us feel loved and honoured on the 5th of September every year.

This year it's going to be different with virtual celebrations. We will miss you and your plans to surprise us with a plethora of fun events and activities. The cheerful and infectious smiles, the unparalleled enthusiasm evident in the decorated classrooms, the hustle and bustle to shower us with handmade gifts, flowers, cards, and thank you notes - we will miss it all! Every year we look forward to battling you on the sports ground during the fun matches organised painstakingly for us and your incredible onstage performances. We will particularly miss seeing you dress as teachers and playing our roles so effectively in the classroom.

Yes, dear children, we will miss all this, but most importantly, we are really going to miss seeing you and meeting you all in person!

We cherish each moment spent with you and look forward to celebrating Teachers Day in person with you all soon.

Love and Blessings,
Your beloved teacher,

SHARVARY GOVANDE

Let's hear
about the
importance of
student
teacher bond

Teacher Student Bond

-Aradhana Rana

The Guru- Shishya bond is like no other! It takes the affection from the mother-child relationship, the firmness from the father-child relationship, the understanding from peer group friendships' and the sharing from the sibling relationships. This is then lined with respect, care and love, and thus a life-long bond is cemented!

There is a bit of the teacher in every child that is mentored by her/ him. Therefore, a teacher's shoulders are always heavy with the responsibility of being on the pedestal in the eyes of the child.

On the other hand, children yearn for the approval of the teacher and see the invisible halo around her/ his head as the guiding light of his/her life. Such is the magic of this beautiful bond!

The rewards of being this guiding light can never be compared to anything materialistic, because it is this soul connection that is a reward in itself! Rewards are seen in the admiring eyes of the pupils, the loving words used to eulogize the teacher, the heartfelt message notes and cards handed over by students to their beloved teachers. They express their innocent emotions through these, making Teachers' Day a special event for every student and every teacher. May this love and respect always remain!

Aradhana Rana

Let's learn
why it is
important to
respect things
around us.

Versatility of Respect

-Bhavana Narsingoj

**‘Respect is one of the greatest expressions of love’
- Miguel Angel Ruiz**

I believe that ‘Respect’ is not just limited to treating another person right, but using every privilege we are blessed with judiciously. There are four important forms of ‘Respect’ that I incorporate as part of my teaching regularly.

1. Respect for Time:

We are all blessed with 24 hours in a day. Prioritizing our tasks with the help of simple tools like setting reminders, focusing on the task at hand and not taking time for granted will ensure success in every field. Starting your day early and reflecting will help a person at any age, live his/her life to the fullest.

2. Respect for Health:

‘Without Health there is no Wealth’. Respecting the possibilities and limitations of our body with timely rest, nourishing it with wholesome food and challenging it with ample movement, will help us be productive and positive individuals. ‘Being Present in the Moment’ is an easy way to respect our mind and body.

3. Respect for Relationships:

‘Man is a Social Animal’. We are wired to need human interaction. Respecting people around us must not be a choice but a way of life. I firmly believe that any problem in the world can be solved with kind words. Speaking in a softer tone, listening to the other person, smiling, appropriate gesturing and eye contact are easy ways to express respect for relationships.

4. Respect for Nature:

There are invaluable lessons that we can learn from a growing Sapling, a sturdy old Tree. The high Mountains and the always punctual Sun. Respecting nature around us, can be practiced in small measures by listening to the chirping of birds, observing how the sky changes its colors throughout the day, or simply speaking to the plants. Respect for nature can be expressed by preserving it and appreciating it regularly.

Consistently practicing these four forms of 'Respect' is the best thing you can do for yourself as well for the people around you.

Mrs. Bhavana
Narsingoju

Principal,
Symbiosis Junior College,
Kiwale
Founder,
Women with Wisdom
Ladies Club, Baner

- Priti Chetan Muthiyan

Multiplication when tens place digits are the same and the sum of unit place digits is 10.

STEP 1

To get the unit's place digit multiply the unit's place digit of both the numbers.

STEP 2

To get the ten's place digit multiply the ten's place digit with its successor (next Number)

STEP 3

Place the result in step 2 to the left of the result of step 1.

Example 1: $83 \times 87 = ?$

In this problem we see that tens place digit of both numbers = 8 and by adding unit's place digit of both numbers ($3+7=10$) we get 10

Step 1: Multiplying the unit's place digits we get Unit's place = $3 \times 7 = 21$

Step 2: Multiplying tens place digit by its consecutive number we get Tens place digit = $8 \times 9 = 72$

Step 3: Placing the result of step 2 to the left of the result obtained in step 1 we get 7221. So we can say $100000 - 01823$ (Subtraction from 100000)

We simply subtract each figure in 01823 from 9 and then subtract the last figure from 10.

Let's hear
the stories of
some courageous
parents

Special Parenting Journeys

Yash – My Son's Journey

A parent of a 10-year-old, who was diagnosed with Severe ADHD (ADHD stands for attention deficit hyperactivity disorder). It is a medical condition, where-in the diagnosed individual has differences in brain development and brain activity that affects one's attention span, their ability to sit still beyond few minutes is beyond impossible and extreme challenge in self-control and regulation.

ADHD can affect a child's wellbeing at school, at home, impact his friendships, more than anything blows their self-confidence and self-esteem to millions of pieces.

They are an object of Bully.

Yash was five when we got to know of his ADHD and to add to his challenges, we got to know that he had Dyslexia, by the time he turned 8.

The irony of the situation being, neither we had heard of these conditions nor had anyone in our friends or family circle who was aware of what this prognosis was. This meant that I had to learn everything from ground zero, and thus my learning voyage began. Even while I'm keying this write-up, I am learning new stuff. As a mother, I will keep learning and doing what is needed, to make Yash's life better and his full potential is unleashed.

Pregnancy with Yash was full of challenges. He was born in 6 months of my pregnancy and weighed 2 pounds, everyone at the Hospital called him a "Miracle Baby" when he was discharged because his odds of survival were 1:10. The only prayer we had while he was in NICU was that he should just make out alive, 10 years later and he is growing stronger, smarter and adorable every single day.

At 5 when we first heard about his disorder that had to do something with his brain, we realized the road ahead would be challenging. We realized that this was something we could work out with the support of each other, even though it was a long road ahead! To date my husband, my daughter, and self-work as a team of course with the help and guidance of the respective Teachers. The more the hands and brains the easier it becomes, remember this is just not the Mom's responsibility.

Few things that have helped us and that we prioritized - Firstly, accepting and understanding our kid's difficulty and helping him in that area at the same time, leveraging his strong points.

Secondly, there is no time to waste, for we had to quickly set motion the development plan. As a parent, you must realize that the quicker you can provide them with the needed assistance and help, their journey gets better. We started off with the required therapy and remedial classes. Persistent, Perseverance, and Patience have been our Family Mantra.

Thirdly, as a parent we must unlearn most of the traditional parenting, for being a strict parent will not work with these creative minds. Stereotyping kids with challenges are determinant to everyone's wellbeing. You need to know your kid in and out. Get in line with their thought process to know them better, for that is the only mantra for their success.

Fourthly, Learn, Learn and Practice ...never stop, the more we are equipped as a parent the more we can help our kids. Find that right parent group, find that right educator, find that right School, find that right activity, and make things that are right for them and not the other way around. Don't compare and box your kids. You will not get it right the first time, but you will learn and improvise, every time.

Lastly stays positive, motivated and keep visualizing their bright and successful future in your head every single time when the road becomes tough and tedious. DO NOT GIVE UP ON THEM, for they did not ask to be born with this challenge. All they need to unconditional help, support, and a belief, that no matter what, they have their parents who do not judge them and love them unconditionally.

Creativity and out of box thinking are what are needed in today's world. They need empathy and not sympathy, as we do not believe even for a moment that these disabilities are going to stop them from what the future holds, they are the unpolished Diamond.

**By - Yash's Mom
(Jennifer Fernandes)**

Neev – My Son's Journey

Neev, my second-born child has always been quiet and reserved. When he initially entered school, he was the quietest kid in the class. His pre-kindergarten teachers began to remark about his lack of participation in class at first. Teachers began to remark about his low academic performance as he progressed to kindergarten. Because of his reserved personality, I initially assumed he was slow.

Due to his poor grades, PTM meetings became quite difficult for both me and him. I began to put pressure on him and attempt to teach him. At the time, I had no idea what I was doing. My family and friends all told me that I was being overly anxious and that some children begin slowly and catch up quickly after a certain age.

My biggest mistake was thinking that he would be fine without help. One of Neev's class teachers asked me to do an assessment when he was in first grade. I did take him to a regular psychiatric evaluation. The doctor only spoke to him for 30 minutes in front of me before telling me he was OK and didn't require any treatment. This led me to believe that the opinions of those around me were correct. Fortunately, his grade one teacher was not convinced by the evaluation and requested that I do another evaluation with a well-known Clinical Neuropsychologist. I agreed half-heartedly and went for it. Neev's doctor recommended a psychometric evaluation.

After a day-long evaluation, Neev was diagnosed with SLD, which was a shock. Remedial therapy was suggested by the doctor. Finding the right center for Neev was the second part of the challenge. Even though I was staying in Bangalore, there were only a few such centers. After some searching, I was able to locate the appropriate center for Neev, and he has been receiving remedial services for the past 1.3 years. I notice a significant difference in him.

I notice a significant difference in him. He is no longer the class's shy kid. His self-assurance has skyrocketed. In class, he is paying attention and answering.

My only regret is that I missed several opportunities to discover Neev's genuine problem early on. Unfortunately, my lack of understanding of SLD meant that my son had to suffer for all those years in school.

**By - Neev's Mom
(Harshitha Karim)**

Kid's Exclusive

Wishful Tree

Vignesh was a hardworking boy. He used to work on the farm. One day the farmer asked Vignesh to get some good quality seeds from the nearby city. He followed the instruction of the master and left for the city. On the way, there was a jungle. Vignesh got lost in it. the more he was searched for a way out. He got trapped in a dense jungle.

He was tired and hungry. He saw a huge tree which was different from other trees. To relax for some time, he sat down under that tree. Since he was hungry, he was thinking about the delicious food. Magic Happened - all those dishes were in front of him. Without thinking he started eating it. Now he was relaxed, he slept peacefully.

Once it was morning, his logic started questioning him, how come I got food in the jungle? He remembered what his neighbor said, there was a ghost in the jungle. He started thinking about the ghost. Slowly they appeared in front of him. Again a thought came, god saved me.

Moral of the story - What we think, we get that and we become that.

Teacher's Day Poem

Our minds were like blank canvases,
Before you painted us our fantasies.

The knowledge became
the colours to our life,
And the love always made us strive.

The time spent with you,
Can only be achieved by a few.

From entertaining us,
In the school bus.

To disciplining us,
In the assembly fuss.

Those are the teachers,
Who made us the achievers.

Khushi Jain
Class 8
Centre Point school

Teacher's Day

Teachers day in India is a yearly celebration that is celebrated on the 5th of September. But why do we celebrate it only one day? It should be a lifelong celebration, each and every day we should thank our teachers because who we are today is only because of them. In fact, we should thank each and everyone who we come across in our life because Something from each one who we come and learn across in our life.

A mother is the first teacher in everyone's life. A mother is the first teacher of her child and home is the first school.

Let it be a mother or a teacher their duties are never-ending.

A teacher's profession is the only profession that teaches all professions. Let it be a doctor or an engineer or a pilot or any other profession they all learned it from their teachers. Today where the whole world is fighting with the pandemic, where all sections and the economy are suffering this dire situation of lockdown but our teachers were not on holiday, they were taking online classes for all the students even in lockdown.

We say children are the future of our nation but this is only possible because of our teachers because they guide us to do the right things. Today I would like to thank all my teachers and everyone for making me what I am today.

Wishing everyone a very HAPPY TEACHERS DAY.
